

PRO BOUNCE

ENGINEERED FOR SPORT

**THE BEST MATERIALS,
BEST METHODS AND BEST FIT**

THE BEST SOLUTION, THROUGH BETTER PLAY.

NGI

ENGINEERED FOR SPORT

Our cushioned ProBounce tennis court surface is engineered to perform better and work harder in all conditions, so you can, too.

***STRONGER.
BETTER.***

ProBounce is stronger and better than...

- Hard post tension concrete
- Costly new construction
- Crack-filling & repainting
- An asphalt overlay
- Tearing up the surrounding landscape

Our Patented ProBounce Technology is a long term solution for the tennis court you have always dreamed of. A monolithic pavement, cushioned overlay, ProBounce bridges large structural cracks. The surface 'floats' on top of existing crushed stone, asphalt, or concrete. A flexible but stationary pavement for a remarkable look and remarkable play. From surface to resurface, we bring the right fit for every project.

PATENTED TECHNOLOGY • PREVENTS CRACKING

LONG WARRANTY • CLAY LIKE CUSHIONING

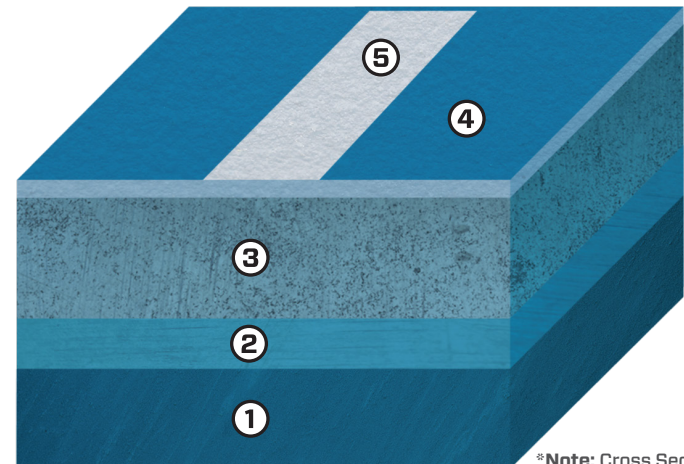

QUICK INSTALL • INDOOR & OUTDOOR • ECO-FRIENDLY
